QIP Goals - Moving forward in 2022

PARTNERSHIPS WITH FAMILIES

It is integral to build genuine ongoing relationships with our families to enable open and honest communication. Building a genuine partnership involves a commitment to respectful and reciprocal relationships and to support families as children's first and most influential teachers. We would like our families to become more involved in our centre based decisions. Further to this, it creates a comfortable platform for families to play a part and have input into their child's time at Jindabyne OSHC.

Embedding Cultural Awareness

Educators acknowledge the importance of promoting cultural awareness within our service to allow children to gain further knowledge and respect for all cultures within our service and within the wider community. Educators aim for children to acknowledge and respect the traditional custodians of the land on which Jindabyne OSHC stands.

Inclusion to Jindayne OSHC means providing short and long-term strategies for improving and embedding inclusive practice for the inclusion of Indigenous Culture and children with additional needs alongside their typically developing peers. To assist with implementing these strategies a Strategic Inclusion Plan (SIP) and a Reconciliation Action Plan (RAP) are in development to ensure we are working towards this goal.
