

Sun Protection – Families Supply Hats for their child.

Background

Australia has the highest incidence of skin cancer in the world. Of all new incidents of cancer diagnosed in Australia each year, 80 per cent are skin cancers. Given that children in childcare attend during peak ultraviolet (UV) radiation times and that they spend much of their day outdoors, childcare has a major role in minimising children's UV exposure. When UV levels reach 3 or above, unprotected skin can be damaged and UV levels can reach 3 or above during most months of the year. Further, childcare provides the ideal opportunity to instil in children long-term positive SunSmart habits.

Policy statement

The Service takes every reasonable precaution to protect children and staff from the harmful effects of exposure to the sun while they are at the Service or at any event organised by the Service.

The *Sun Protection Policy* is consistent with the Cancer Council's SunSmart recommendations for outdoor environments, clothing, sunscreen, scheduling of activities, and ongoing education for the children, families and staff at the Service.

Strategies and practices

- The *Sun Protection Policy* is explained to parents when they enrol their child in the Service, and their attention is specifically drawn to their responsibilities under this Policy. The *Sun Protection Policy* is available for parents to read on our website www.gidgillys.com.au/jindabyneoshc
- Educators promote sun safety awareness in children by including it in daily routines and intentional teaching such as role-modeling, discussions, applying prior to playing outdoors.
- Whenever possible, activities are set up and moved to take advantage of shade patterns.
- All children and educators wear a hat on the outdoor playground so they can move freely between shaded and unshaded areas.
- The Service has iPad. Each iPad has the SunSmart app downloaded with the auto alert function activated. Educators check the app for UV rating times and follow the app's directions when programming outside play.
- Educators follow the instructions according to the UV ratings listed below:
 - 1,2 – Children and educators wear a hat when outside
 - 3,4,5,6,7 – Children and educators wear a hat and apply SPF 30+ (or higher) sunscreen when outside (provided by Jindabyne OSHC or the family)
 - 8,9,10 – Children and educators wear a hat, apply SPF 30+ (or higher) sunscreen and play undercover when outside
 - 11+ – Children and educators play indoors only.

Sun Protection – Families Supply Hats for their child.

- Children and educators adhere to the Sun Protection Policy on excursions. Refer to the Service's *Excursion and Incursion Policy*.
- All staff model positive SunSmart behaviour to the children by:
 - wearing hats and appropriate clothing for all outdoor activities
 - using SPF 30+ broad-spectrum sunscreen
 - seeking shade whenever possible
 - wearing sunglasses that meet the Australian Standard (AS/NZS1067:2003) if they choose.
- The Service supplies 30+ (or higher) broad-spectrum sunscreen for children and staff. The sunscreen is available in the entrance to our room. Parents are advised upon enrolment about the use and brand of sunscreen through our policies on our website. Parents are required to notify the Service in writing if their child is allergic to sunscreen, and to supply an alternative clearly labeled with the child's name.
- Any child who does not bring the hat provided is expected to use one from the Service's set of spares kept for the purpose, or to play in the shade. If the spare hat and clothes supply is exhausted, the children without hats or suitable clothing will be required to play indoors in shaded areas.
- Educators ensure children wear clothes with adequate protection from UVR when playing outdoors. Any child who does not have suitable clothing is required to play in the shade. The Cancer Council recommends loose fitting clothes with collars and sleeves, closely woven natural fibre fabric, and of a dark colour.
- Water is offered to children frequently throughout the day regardless of whether they are indoors or outdoors.
- Children are expected to apply broad spectrum sunscreen with an SPF of 30+ to all exposed areas of their skin 15-20 minutes before the children go outside, the children will be supervised while applying however they are expected to be capable of independently applying sunscreen. Parents are to advise OSHC in writing if their child/ren requires assistance.
- Educators ask children to reapply sunscreen every two hours if children are outdoors for a prolonged period, or more frequently if the children are perspiring or involved with water play.
- If parents supply their child with sunglasses that are wrap-around and/or are close fitting (that meet AS 1067-EPF 10 is best), educators will ensure children wear them during outdoor play.

Responsibilities of parents

- To bring the hat each time their child attends the Service, and to ensure the hat is clearly named and kept clean.
- To dress their child in SunSmart clothing, including spares, each time the child attends the Service.
- To model positive SunSmart behaviour to the children when at the Service.

Sun Protection – Families Supply Hats for their child.

- To notify the Service in writing if their child is allergic to sunscreen, and to supply an alternative sunscreen clearly labelled with the child's name.

Policy review

Sun Protection – Families Supply Hats for their child.

The Service encourages staff and parents to be actively involved in the annual review of each of its policies and procedures. In addition, the Service will accommodate any new legislative changes as they occur and any issues identified as part the Service's commitment to quality improvement. The Service consults with relevant recognised authorities as part of the annual review to ensure the policy contents are consistent with current research and contemporary views on best practice.
